

Title	QR Reader
Version	7.5
Publisher or Producer	TapMedia Ltd
Target Audience	12+
Types of Software with your Justification	QR readers are used as tools to condense information into one spot for users to access or just make it easier to access something.
Curriculum	QR readers can be used in the classroom for several different things. You can use them for audio books, as links for students while working on projects or if they need help or more information, as well as, games for the students. This could be used in any subject and helps change things up for the students.

Cost	<p>Free for basic usage & \$1.99/mo for the Pro</p> <p>There is a free trial for 7 days of the pro</p>
Description of the Software	<p>There are four options at the bottom of the homepage - home which is where all the scans you have taken will be, search which brings up many shopping options, a camera so you can scan the QR's, and a picture of a QR. That last one is where you can create your own QR and for the free version you can just change the background color while the pro allows for you to completely customize the look of your QR. This app offers several types of QR's that you can create ranging from text, contact, email address or phone number all the way to social media profiles, youtube, and medical ID's.</p>
Impression of the Software	<p>I think that this app would be good for just basic QR scans which aren't that popular anymore but I do think they would be cool to offer in the classroom for the students. I do think that this app would also be good to create QR's but the free version doesn't offer very many options like the pro. The search bar bringing up different shopping websites I thought was weird, I'm not sure if I missed something but I found it odd to be included with this app.</p>
Pass APPS	<p>Although this app is not visually appealing, it is just a tool to be used when necessary, it does pass apps because it is easy to navigate, has a reasonable cost, and is appropriate for the intended age.</p>

Title: QR Reader

Questions	Yes	No	Comments/ Notes
Have you played enough to know every aspect?	X		

<ul style="list-style-type: none"> Did you try things that were wrong and/or unexpected 			
Did the software crash?		X	
Was the content appropriate? Did it meet the user's needs?	X		
Were the screens appealing? <ul style="list-style-type: none"> Color, items on the screen, sounds 		X	Just an average, simple app to cover the basics
Is it easy to navigate?	X		
Is it easy to learn?	X		
Does the user need Supervision to use?	X		Students would need supervision but only because of the random shopping on the app.
If the App required a response, was it appropriate? (right or wrong)		X	Did not require a response
Were there bells and whistles? <ul style="list-style-type: none"> If so, do they enhance instead of detract? If not, should there be? 		X	We don't think that this app HAS to have any bells and whistles since it's so basic but it would be more fun if they did jazz it up a little.
Did you like using the App?		X	Didn't really care for it and wasn't able to do a lot with the free version
What was the cost? <ul style="list-style-type: none"> Was there a "lite" version <ul style="list-style-type: none"> If so, was it enough 	X		Free or lite version or pro for \$1.33 a month. There is also a free trial for pro for 7 days If you are wanting to create a lot of QR codes or have fun with it I do not think it would have been enough
Were there in-app purchases? <ul style="list-style-type: none"> If so, what were the additional costs? 		X	The in-app purchase is just upgrading to the pro

How does it compare to other apps that do the same?			They all seem pretty simple and basic
Additional Comments			

Developmentally Appropriate
