Title	Total Recall: Learn Vocabulary
Version	It is not stated in the app store but I'm assuming it is the only version especially since it is so new
Publisher or Producer	**Indrani Ghatare**
Target Audience	**17+**
Types of Software with your Justification	This app could be used for drill and practice since you are utilizing it to learn vocabulary. It also utilizes discovery learning since you have free reign in how you want to set up the information on each word and can also be used as a tool since you are using the app to basically create flashcards.
Curriculum	This app targets vocabulary specifically so it could be used for vocabulary words to help students achieve a better understanding of the word.

Cost	Free
Description of the Software	This app is to be used for help with vocabulary and has three options when you open it - review cards, learn, and about the app. You can add your vocabulary words and definitions under learn by adding a word. When you add the word it automatically pulls up a google search of the word providing its definition from several different websites. After writing in the definition of the word it gives you the option to write a story which is displayed like a text message conversation but where you can add in dialogue from each party to help explain the word. You also have the option to deconstruct the word into "meaningful parts" by breaking it down and then providing the definition for each part. The last option it provides when creating the vocab card is to make connections by entering phrases that will help with the definition. This information is all attached to the word when you review the definition.
Impression of the Software	I'm usually wary of apps that do not have any reviews because I want to make sure that it is established and the best version. This app is not one that I would use because I personally would want something simpler - with this app you have to manually enter in the vocab word and its definition. Yes, it is easier\n\nThis app is not one that we would use because it seems like there is too much to do as far as creating the "cards". It would take too long to get all the information entered in verses just using regular flash cards or even another app.
Pass APPS	This does pass APPS since it is easy to navitage and learn, content appropriate for the age level listed and even younger kids could use it. Although it is not visually appealing, it seems very plain but it is a fairly new free app that does not even have enough reviews on it yet. Maybe with more time or if it becomes more popular they would work on their look later on, but it is not necessary.

Evaluators: Lindsay Lewis & Megan Scott

Questions	Yes	No	Comments/ Notes

Question	Yes	No	Comments
Have you played enough to know every aspect? • Did you try things that were wrong and/or unexpected	X		
Did the software crash?		X	
Was the content appropriate? Did it meet the user's needs?	X		
Were the screens appealing? • Color, items on the screen, sounds ……		X	It tried to be visually appealing but it could have been set up better. Also, more features could have been implemented to make it easier or quicker on the user.
Is it easy to navigate?	X		
Is it easy to learn?	X		
Does the user need Supervision to use?		X	
If the App required a response, was it appropriate? (right or wrong)	X		This app is used to create vocabulary cards utilizing different methods to help the user recall the definition. I think if it is used properly then you would get the required response.
Were there bells and whistles? • If so, do they enhance instead of detract? • If not, should there be?		X	There could have been some bells and whistles added to improve the app but for it being free it's understandable.
Did you like using the App?		X	We both decided we would not use this app to help with vocabulary.
What was the cost? • Was there a "lite" version • If so, was it enough		X	

Questions	Yes	No	Comments/ Notes
Were there in-app purchases? • If so, what were the additional costs?		X	
How does it compare to other apps that do the same?			It does what it is meant to do but there's other apps that do more.
Additional Comments			

Developmentally Appropriate

Questions	Yes	No	Comments/ Notes
