

Evaluation Write-Up

App Title: **Planboard**

Version: **2.27.2**

Publisher/Producer/Creator: **Chalk.com Education Inc**

Target Audience: **4+; Should be for older grades & teachers/administrators**

Type(s) of Software:

This app would be considered tools. This app is a planning and organization app and could be used to plan lessons, organize assignments and prepare for instruction and/or events.

Curriculum(s):

This app could be useful in all subject areas as well as life in general. This is not a specified app so it is very inclusive. It could be used for school, sports, business, etc. More teacher centered (lesson planner & gradebook)

Cost:

There is a free version, \$30/year version and campus version that you have to reach out to Chalk.com for pricing. The free version is limited and Pro is the full version.

Software Evaluation:

Planboard is an excellent planning tool but is definitely not for younger grades. It is more teacher focused than student, may be beneficial to junior high/high school/college students. Very plain but not very simple. This app is difficult to manage but easy and helpful once mastered. You are able to set up classes and assignments, connect standards, revise and edit, attach documents and pictures, etc. While this app looks very plain and boring, it is great for organization.

Does the software pass Review? **Yes**

Does the software pass Evaluation? **Yes**
