## Evaluation Write-Up

App Title: Prodigy

Version: 3.4.1

Publisher/Producer/Creator: Developer: ProdigyGame.com Seller: SMARTeacher Inc

Target Audience: This app is for ages 9+

Type(s) of Software: This is an app for simulation. It is wonderful math practice for students ages 9 and up. It could also be used as drill and practice, as it engages students in math practice.

Curriculum(s): This app could be easily embedded into math curriculum for grades 1-6. The app allows students to select their grade level and generates age appropriate content for the students.

Cost: Free

Software Evaluation: The software is easy to use and after using it on both an iPhone and iPad, I can say that it is easier to use on an iPad, since the screen is bigger. The app did not crash and it is set up in a pleasing manner.

Impressions Evaluation: I enjoyed playing with the app and can see how it would be beneficial to use with all ages. After letting my 6 year old play with it at home, I gathered that he enjoyed the simulation and creating his own wizard.

Does the software pass **Review?** Yes
