Use in curriculum: Science, Social Studies, Reading, Writing, Math, Health, Arts and Technology

Cost: BrainPOP Jr. Full Access: \$6.99; BrainPOP Jr. Explorer: \$2.99

Description of the software: “The BrainPOP Jr. Movie of the Week app delivers a different animated movie every week- plus related quizzes and educational activities – free! Ideal for kids in Kindergarten through grade 3, BrainPOP Jr. spans topics across

Science, Social Studies, Reading, Writing, Math, Health, Arts and Technology.”

Personal review of the software: We love how educational this app is. The app was made very well because it allows kids to stay engaged and learn a variety of topics through fun little movies. Kids would greatly benefit from having this app on an iPad and watching the movie of the week outside of the classroom. We think the kids will take a deep liking to the guides Moby the robot and Annie and will be happy when we say we are going to pull up BrainPOP in the classroom. We also think this app is a great resource for teachers because of the wide content areas it covers and how easy it is to search for a topic.

Does the software pass? Yes!
