Description of the software: "Total Recall is the simplest and most elegant mind mapping solution on the iPhone and iPad. You will instantly create beautiful mind maps and share them with colleagues and friends."

Personal review of the software: This app is very similar to Inspiration. We like this app because it would be easy for young students to use without needing much guidance. Initially, the app is

not very inviting. After some work, the app becomes more appealing

with colors, sizes, different shapes, and connections of webs.

Does the app pass: Yes
