

Grade Level/Audience: Kindergarten

Curriculum Topic: Math

Tools: PowerPoint & Prodigy

Synopsis: The students will watch the smartboard as mathematics problems are worked out on the board. This is where we will review the addition and subtraction facts that we have previously learned in the past few weeks. Then we will start on the new mathematics content. The teacher will explain the new content and work out a few problems for the students to write down as well. Then, the teacher will call on a student to come up to the board and work out a problem on their own in front of the class. After a few more students volunteer to go up to the smartboard, the students will get their Chromebook out and go to the website Prodigy. Prodigy is used for challenging students in their math learning. The students will work on this for 15 minutes.
