

Grade Level/Audience: Kindergarten

Curriculum Topic: Science

Tools: Google Forms & Excel

Synopsis: The teacher will set up google forms on the students iPads and the students will type out what their favorite weather type is like. Whether it be, rainy, snow, sunny, cloudy, or storms. The teacher will put all of the google forms together and have the students count how many of each weather type there is. Then, in Excel the students will make a bar graph of the results. This will show the students how to work data.
