

**Grade Level/Audience:** Kindergarten

**Curriculum Topic:** Math

**Tools:** Osmo iPad

**Synopsis:** In class, we will be going over different shapes and their colors and sizes. With the Osmo, the students will play the tangram game by themselves. They will be working on individual iPads and trying to figure out how many shapes they need to come up with a new shape. The students will also be matching the different colored tangrams. The new shape they make will have to be all the same color. When finished, the teacher will go around the room and ask the students how many shapes they used and what is their favorite color.
