

Grade Level/Audience: Kindergarten

Curriculum Topic: Science

Tools: Beebot/Coding

Synopsis: At the beginning of class, we will be focusing on sequencing. The students will be put into groups and given a beebot robot to work with. First, the students will work together come up with a sequence to wrap a present. The students get to decorate their box first and then tell the teacher how to wrap a present. After, the students will come up with a code to together using the beebot. They will come up to the front of the classroom and show the class the code they came up with.
