Title: Total Recall

Version: 5.0

Publisher: Indrani Ghatare

Target Audience: The app is targeted for ages 14 and up but we believe that younger children can easily use the app. There should be user supervision because the app allows unrestricted web access.

Type of Software: The Total Recall app is a Tools software and Tutorial because the user is able to create any project they want, but also has the ability to look up new vocabulary. The user has the ability to create different projects, with different set ups.

Curriculum: The app could easily be a great resource for all curriculum subjects. The app could be used for Math, Science, English, Reading, and so much more.

Cost: The app is completely free and does not have any in app purchases. This is so good for students, because it doesn't cost a thing.

Software Description: Total Recall is an app that allows students to create projects, and learn new vocabulary. The app allows the user to learn new words, study new words, and create projects. This app allows for a worry-free time without any distracting ads, and privacy of data. There are so many cool effects on the app, that allow many colors, and formats.

Software Impression: The app is so neat. We love that the app allows students to learn new content but also create something with the content learned. The app is easy to navigate and use, allowing young students easy access with not much guidance needed. We feel the app does need some supervision because the students can look up any vocabulary word they want.

Does the app pass? Yes
