

Title: Grade 2 Math

Version: 5.6.1

Publisher/Producer: Studypad, Inc.

Target Audience: years: 6,7,8

Types of Software: Educational-Math

Curriculum(s): This app can easily be fit into the 2nd Grade Curriculum because it is made and specifically tailored to provide math skill games specifically for this age group. Things like place value, number sense, adding/subtracting within 1000, time, money, measurements, data, and geometry.

Free Version: this app does not have a free version, but it does have a one-week free trial then \$9.99 monthly subscription after that. App is free for teachers!

Description: This app provides many games relating to all Common Core Math Standards. Not only does this app have games relating to all of the standards but also it gives progress and feedback, so it is easy to assess the student's math learning and skills. This app is categorized by things like "adding withing 20" or "measurements" and is very easy to navigate.

Impression: This is truly and amazing app that could be very beneficial to the classroom and at home. It would make it easy on the teachers to assess a student's math knowledge and motivate the student to practice by playing the games in this app. This app is well worth the monthly subscription for personal use and well worth the time to use in the classroom since it is free for teachers and classroom use.

Disagreements: None
