

## On-line Tools

### Kahoot

<https://kahoot.com/>

#### Description of the tool:

Kahoot is a wonderful tool to take quizzes, surveys, and have discussions. Students can work individually or in teams. This is a great way to create quizzes and make them fun for students.

#### How I plan on using the tool:

I will use this as a fun review tool to go over the material before a test or to enhance a lesson.

### Remind

<https://www.remind.com/>

#### Description of the tool:

This is a website and app that allows users to communicate with teachers, students, and parents safely.

#### How I plan on using the tool:

I will use this with parents to communicate information and to send reminders for events and special occasions.

### Edmodo

<https://new.edmodo.com/?go2url=%2Fhome>

#### Description of the tool:

This tool allows students, parents, and teachers to be connected. Students can communicate with their fellow classmates and teachers. Parents can stay up-to-date with what their child is doing in school. Teachers can easily grade and give feedback on student assignments.

#### How I plan on using the tool:

I plan to use this by creating a group that includes my students, and all parents will have access to it. I can post assignments and make class-wide announcements.

## On-line Tools

With on-line tools, I have found that there are many different ways to integrate and incorporate technology into the classroom. All of these tools will benefit me as a teacher. I prefer each of the tools that I listed and described. These tools will help me, my students, and their parents. I will be using all of these tools in my classroom.
