

## VPOD Project

For my VPOD project I used Photo Story to create all of my videos. I really enjoyed using the program. It was very easy to use.

I will definitely use Photo Story again. I have added to my list of resources to use when I get my classroom.

1. **Videos are easier to be accepted by students-** Videos are sometimes the best thing you can use in order to reach students. Kids have fun watching videos and are the perfect venue for providing new information.
2. **Video brings more information-** Videos are full of information and provide information in an easy, fun way that students will enjoy.
3. **Integrate the outside world into classroom-** By using videos, you can integrate the outside world into the classroom. This makes it easy for you to create authentic, unique, and fun lessons that will immerse students.
4. **Easier to understand-** Using videos for learning makes it a lot easier for students to understand various topics and ideas. It is one of the best learning tools you can use.
