

BOLT BOLT GO FIND BOLT

Subject: Mathematics

Grade: Kindergarten

Tools: Bolt and Google Sheets

Synopsis: This activity will put in a center for students to play with at least once a day. This game consists of find bolt and moving him around to find the correct answer, but you have to complete the google sheet to find the correct answer. So, on the google sheet there will be addition problems and the student will have to complete the addition problems. After finishing all the problems, they will then have to figure out where to find bolt by the answers. So, if the answer is 1-3 you go forward the number amount. Each time you move you will move in the boxes on the ground. If the number is 4-6 you go left, 6-8 go right. If the students do this correctly, they should be able to find bolt. After finding bolt they are able to move him around the room for the remainder of that center time.
