QR Code

Version 1.1

TapMedia Ltd

Target Audience: The publisher does not have an age group preferred to use the app. We think that if you understand how to use the app, then you can use this. So maybe ages 7+.

Curriculum: This app allows its users to create and scan QR Codes. You could use this for educational purposes if needed.

Cost: This app is free to download and there are no in app purchases.

Description: With this app, you can create and scan QR Codes. There is really not anything else we can write about this.

First Impressions: We think this app is super cool for older students to use to create and scan QR Codes. We do not really see how elementary students could use this app though. We can see how teachers could use this app, but we do not see a purpose for elementary students.

Pass: no, not for elementary students
