Splice

Version 3.6.3

Bending Spoons

Target Audience: There is not a certain age group that the publisher thinks should use this app, but we think that this could be used for older students and up.

Curriculum: This app allows its users to make "fully customized, professional-looking videos" that can be for educational purposes.

Cost: The app is free and there are no in app purchases

Description: This app is used to create videos and projects. Compared to the go pro app, this app is very similar, even in design.

First Impressions: We like this app a lot and think it is very convenient for teachers and high school students, but not necessarily elementary students. We probably would not implement it into our classroom for that reason.

Pass: Teachers could use this, but not students…. But yes
