### Bread Experiment

Students will conduct a project to show the spread of germs through the bread project.

### Bread Experiment

Students will gather three pieces of bread and Ziploc bags to conduct this project.

## Dirty Hands

The first bread slice students will use their "dirty" hands.

## Sanitizer

On the second slice of bread, students will sanitize their hand.

## Soap & Water

On the third slice, students will wash their hands properly.

## Observation

After 7 days, students will bring their slice to school and we will talk about the spread of germs.
