

## **Mini Lesson: 2**

**Grade Level:** Kindergarten

**Curriculum Topic:** K.MD.C.6- Identify pennies, nickels, and dimes and know the value of each.

**Tools:** Students will use the OSMOS- Pizza Co tool to practice identifying pennies, nickels, and dimes. I will use PowerPoint to display the different types of cents and their value.

**Synopsis:** For the introduction, I will provide students with a PowerPoint to introduce the concept of money. During this, the students will be shown pictures of pennies, nickels, and dimes in order for them to be able to identify and differentiate between the different cents. For the instruction, I will introduce and explain the OSMOS-Pizza Co game. The game comes equipped with a pizza board, topping, and money. Students will also need an iPad to connect the game with the board. Students to create a pizza based off what customers ask. Once they have completed this step, students then will flip over the pizza board, and receive a payment from customers. Often times, the customer will give them too much money and so students will have to give change back to the customers. This allows students to follow instructions and use math as well. For the conclusion, pictures will appear on the screen and students are to identify the change and the amount.
