

Targeted Grade Level: Second

Subject(s) Focused On: Math

Tools Used: Osmo & iMovie

Synopsis: For this lesson, we will practice what we learned in previous lessons using the software called Osmo Math. Before using Osmo in my class, I will show them a How-To focusing on how to use this particular software, although it is somewhat self-explanatory. The how-to video will be there just to lessen the confusion of the software.
