

Today I will be teaching you how to use an app on the iPad called "Big Math Flash Cards."

After you learn how to use this app, you can download it on your personal iPads at home and practice anytime you want.

Here is what you see when you first open the app.

By clicking here, you can see that there are 4 different game mode. There is an option to practice addition, subtraction, multiplication, or division.

Just for today though, I am going to instruct you on how to use the addition and subtraction modes.

There are different levels of difficulty ranging from easy, medium, and difficult.

Just to keep it simple, I am going to choose the easier option since this is a tutorial.

Play around on app.

Show how to do about 4 problems so the class can see how it works.

Explain why app is good for drill and practice.

END
