Evaluators: Teagan Russell, Madison Martin

Title: ATM Shopping Cash Simulator-Credit Card Game

Publisher: Kashif Mahmood

Target Audience: Ages 4 & up

Use in curriculum: This app would be great in teaching children about the concepts of money, and how to use money in the real world.

Cost: Free.

Describe the software: ATM Shopping Cash Simulator is the quick way of drawing money, showing kids how to operate an ATM, and the concept of money.

Describe your impressions on the software: We were skeptical at first, considering the app has no ratings. The app itself seems pretty educational, showing children about banking, ATM, and shopping. We enjoyed how it included deposits within the bank, and how it included the cash register at the store.

Does it pass APPS? Yes.
