<u>Educational Software Write Up</u>

Evaluators: Teagan Russell, Madison Martin

Title: Explain Everything

Version: 5.4.7

Publisher: Explain Everything sp. Z o. o.

Target Audience: Ages 4+

Use in curriculum: This app could be used by students to display information in the classroom. Students could use this app to takes notes during class, it can also be used to keep up with information that they have used for bigger projects.

Cost: Free (for the first 3 projects,) Originally $107.99 per year, but on sale right now (10/09/2019) for $69.99 for a year.

Describe the software (enough to visualize): The only interactive whiteboard that has real-time and continuous collaboration with voice chat, and advanced recording and timeline editing that can be shared as a web video link.

Describe your impressions on the software: (good and bad aspects)

We really enjoyed how the students can easily collaborate with each other. The 'code' option, where students can join one another on one project or in one folder. Along with the invite option, its super easy for students to work together to complete assignments. We also liked how students can easily write, edit, and record their own voice. This brings a new aspect to taking notes!

Does it pass APPS? Yes
