Educational Software Write Up

Evaluators: Teagan Russell, Madison Martin

Title: Lucidchart

Version: 3.3.11

Publisher: Lucid Software Inc

Target Audience: Ages 4 & up

Use in curriculum: This app can be used to create charts within the classroom. Such as when students are writing and collecting their thoughts, this app can be used to keep everything in track for writing. Also for science projects, or notes.

Cost: Free to create an account, $9.99 for professional, $5.99 for basic.

Describe the software: "Lucidchart is the simplest way to build diagrams on your iPad or iPhone." This app assists in creating flowcharts and many other diagrams.

Describe your impressions on the software: We enjoyed the app, and the choices that they provided for the graphs in the free version. We believe that paying for this app would be foolish, considering the amount that they provide just in the free version. We believe that it might be a little to advance for 4 year olds.

Does it pass APPS? Yes.
