

Michaela Moore

Osmo

This lesson is for 2nd grade. In this lesson we will have 3 different stations set up during that use the Osmo games. The three we will be using is pizza co., numbers, and tangram. The students will work in groups of two at each station. These are to help the students get a better understanding of their organizing, counting, and shape recognition. We will need iPads and the three osmo set ups. The children will get 15 to 20 minutes on each station. They will get to explore and have a better understanding of each content area. The goal is to help those who are struggling with math to get a chance to learn in a different way. I want to use this in a course of two or three days, so each student gets a chance to play with each Osmo. This is a fun way to ingrate technology and remediation.
