

Title: 5<sup>th</sup> grade Math

Version: version 1.7

Publisher/Creator: Deepak Raangdale

Target Audience: 5<sup>th</sup> graders

Type of software: Tutorial because it provides lesson for 5<sup>th</sup> grade math students

Curriculum: I think this could be used for introductory lesson in my 5<sup>th</sup> grade class. The app cost so I did not use it but it seems like it would be good tutorials for students

Cost: \$1.99 to download

Description: The app is designed for 5<sup>th</sup> grade math. It includes tutorials, worksheets, and quizzes for the students to use. There are 33 different math topics in the app for students to learn.

Impression: Again I did not download this app onto my Iphone because it cost but reading about it it seems like a good app. Based on the descriptions and the photos provided it seems like it could be useful to students who need math tutorials

Does the software pass review? Yes

Does the software pass the evaluation? Yes
