

Title: GoNoodle- Kids Videos

Version: 3.5.0

Publisher/ Creator: GoNoodle Inc./ Scott McQuigg, Abby Percoriello, Aaron Brigs, and John Herbold

Target Audience: Ages 4-10

Types of software: Discovery learning because the user choose what content they want to use/learn.

Curriculum: It does not fit into any of our curriculum. We see this as more of a out of school or free time app.

Cost: No cost

Description: The app is designed to get students up and moving. It is filled with videos that include yoga, stretching, dance, and deep breathing. GoNoodle tells three different ways to use the app, "GoNoodle together," "GoNoodle to get something done," "GoNoodle on the go."

Impression: We found the software to be slightly inappropriate due to phrases in videos like, "Get you hand out of your pants." Although it was very colorful, it was very disorganized and unappealing. Also, there was an ad, which I find it distracting and could lead to unwanted exploration.

Does the software pass Review? NO

Does the software pass Evaluation? NO
