Title: GradeMe-A teacher's best friend

Version: 1.3

Publisher/Creator: Kevin Parrett

Target Audience: Teachers

Type of software: Tools because it is meant to make grading easier for teachers

Curriculum: It could be used to help grade but using the app it doesn't really seem like anything I would use in my curriculum

Cost: Free with Ads

Description: The app has you put in the number of questions on your exam and just totals up the different grades based on how many would be missed.

Impression: Honestly not a huge fan of the app. It was not what I was expecting. It would be easy to use but I think just hand grading would be just as easy. Very basic app

Does the software pass review? Yes

Does the software pass the evaluation? No
