

Title: History.. -iPhone

Version: 1.6

Publisher/Creator: Unicom TOV

Target Audience: Anyone who loves history

Type of software: Discovery Learning because you can choose what kind of information you want to learn about from that day in history. You can learn about births, events, and deaths from history and you are the one picking

Curriculum: I think I could use this in a history class as like a daily warmup activity. I could ask my students to get on the app and tell me something about that day in history and let them decide what they want to tell me.

Cost: Free

Description: This is a this day in history app that provides all kinds of information from that day in history. Most of the headlines have read more buttons so that you can learn more about that event or person. The app is divided into Events, Births, and Deaths

Impression: I like this app because it is easy to navigate. It is also easy to read and is very informational. I wish you could look at more days than just the actual day but I guess since it is a this day in history app that makes sense.

Does the software pass review? Yes

Does the software pass the evaluation? Yes
