Cost: \$19.95 a month/core

\$9.95 a month/single

\$4/ each additional child

Yearly/ save 33%

Description: This app is personalized to meet the needs of each student to help them practice and review skills that they need extra help in. Although IXL Math is geared towards mathematics, the company provides help in each subject area. The app also provides feedback as you work problems to help the user better understand what they are doing right or wrong.

Impression: This app seems, to us, to be in good working condition. Reviews of the app tell a different story, with many saying that it is too hard and full of bugs. We also could not get on to fully analyze the app, due to it not having a free trial.

Does the software pass Review? Yes

Does the software pass Evaluation? No, because when we dug deeper into the app, we discovered potential problems based on user reviews.
