Title: Math Brain Booster Games

Version: 2.4.3

Publisher/ Creator: Kirill Dyakonov

Target Audience: We think it is meant for 1st-4th graders.

Types of software: Drill and Practice

Curriculum: This would definitely help Markus with his 4th grade students in Math. He can incorporate this app when doing review of multiplication and basic operations.

Cost: One-time purchase of $7.99

Description: This app helps increase productivity for children. It is a great way to review and practice math skills. There are different training models, math tips, and task solving units.

Impression: We really enjoyed this app. We had been looking for a good app for math and found this one! I feel like this is a great drill and practice software that we could utilize in the classroom.

Does the software pass Review? Yes

Does the software pass Evaluation? Yes
