

Title: Popsicle Sticks

Version: 3.2.5

Publisher/ Creator: Neil Daly

Target Audience: Teachers

Types of software: Tools because you can create multiple classrooms with different students so it's easy to keep everything organized while still using the main functions of the app.

Curriculum: We could use this when creating groups, picking students to call on, and take roll easier. That is all that we would use in our curriculum.

Cost: Mostly free/ Full version \$4.99

Description: This is an app to randomly select and group student together. It can score responses during discussions, create classroom tournaments, and energize your daily roll call.

Impression: Markus liked this app. He liked the random selecting to replace the old popsicle sticks method. Anna was indifferent about it. It kept popping up random message, so it took a minute to actually get to the parts she wanted to use. Other than that, it was okay.

Does the software pass Review? Yes

Does the software pass Evaluation? Yes
