

1. Grade: 1st
2. Curriculum: Performing various movements of the body parts
3. Tools: My computer and device so students can see what I'm doing on my computer on the board, a skeleton
4. Synopsis: I will have my computer screen where the class can see it, then I will pull up a website that contains the body and body movements. I will then have my students stand up and we will perform moves together. I will then roll out a skeleton so students can get a better view of their bones moving
