Carlee Collins, Erin Rezanka, and Maggie Schreit

Title: Explain Everything (Tool)

Version: Explain Everything (version 5.2.3), there is an Explain Everything Whiteboard, as well

Publisher: Explain Everything sp. Z o.o.

Target Audience: 4+, this app is appropriate for young children, but children would need to be able to navigate and understand basic technology skills and tools. This app is very appropriate and very suitable for younger students in younger grades. Students would get great use from this app, it is very developmentally appropriate. Compatible with iPhone, iPad, and iPod touch.

Curriculums: This app would be great for any and all subject topics. Children and teachers would be able to create projects right at their fingertips. With many colors and font options, a great project can be easily made and used in the classroom. Children could create projects for presenting and would be able to collaborate with others. Explain Everything would fit and be appropriate for all curriculums and subject topics.

Possible Environments and Why: Explain Everything would work great for home and classroom use. Children and teachers would be able to create fun projects and documents to share with others. Fun lesson ideas can be created with Explain Everything. Students would have the opportunity to create a project or a fun document using this app. This app could be used at home, as well. Parents could use this to create colorful, fun chore lists, grocery lists, and many more! Explain Everything is great for organization and great for creating fun ideas and projects with easy use.

Cost: Free, but $12.99 monthly

Software: Many options are available for use. The software allows you to create various projects at your fingertips. Essentially, this is great for anything a user wants to make. Whether it's documents, PowerPoints, anything! There are many color options, font options, photo options, clip art, anything you can think of. This software gives you options to invite and share with others, so it's easy to collaborate with.

Impressions of Software & used in Class: This software is incredible. It is so easy to use and extremely helpful. There are endless options and opportunities. It's a great and easy way to create any project. The software is easy to navigate and very simple. There are many options, but it isn't too overwhelming. Very appropriate for school and for children. This would be great for children to create projects to share with others in their class. This would also be great to create as a teacher for various lessons. This is an easy way to create a visual for students to see when teaching or introducing a concept. The reviewers said nothing but great things about this app, a few mentioned some minor troubles with the app since the update, but we had no problems with the app at all.
Does Software Pass: Yes
