Title: Total Recall (Tool)

Version: Total Recall – Only version (version 5.0)

Publisher: Michel Neuhaus

Target Audience: 4+, this app is appropriate for younger students and they should be able to properly use this app. This app is great for younger students who want to use a map in some way. Very simple and easy to see, appropriate for younger students. Compatible with iPhone, iPad, iPod touch.

Curriculums: This app would be great for any curriculum. Any subject area would be appropriate for using this app. It's great for any areas and can be very useful when wanting to create a map to organize or share information with others.

Possible Environments and Why: This app would thrive in a classroom setting. Children would be able to use this app for any and every subject area. It's great for organizing information about any topic and its great way to showcase information in a different setting. This can be used at home, as well. From organizing chores, to keeping track of to-do lists, this app can be very helpful and useful in many ways.

Cost: Free, no in app purchases

Software: Very similar to inspirations. This software allows you to create various webs and structures that organizes various subjects and concepts. The software is colorful and appealing to the eye. You are able to connect the webs to show connections within concepts and information. This software is great for organizing various topics/subjects. Easy and simple to use, this app can be very eye-catching when creating maps and webs. Not many options when it comes to adding various fonts/pictures, but still an app that is helpful for creating maps.

Impressions of Software & used in Class: Really cool, very similar to inspirations. There aren't near as many options when it comes to adding photos or links. You are still able to connect and make charts, but as far as it goes with adding graphics, changing font, you don't have many options available. Very basic, but still neat. Children would be able to create outlines without much confusion. This would be great for younger students who aren't as familiar with technology. This software is very basic and easy to use, it would not be confusing for younger students to use and navigate.

Does Software Pass: Yes.
