

HABITATS

By: Ms. Maggie Schreit

A satellite-style image of Earth showing continents and oceans, with a white text box overlaid in the center. The text box contains the following text:

EARTH'S ANIMALS LIVE ALL OVER THE WORLD
IN ALL SORTS OF ENVIRONMENTS. LET'S TAKE A
LOOK AT THE LIFESTYLES OF MANY DIFFERENT
ANIMALS ON EARTH.

GRASSLANDS

The grasslands are dry, tall grass lands where only few trees can grow. These areas are mostly seen in the African Savanna. What animals do you think live here?

BROWN BEAR

COUGAR

ELEPHANT

ANIMALS IN THE GRASSLANDS

JAGUAR

LION

ZEBRA

DESERTS

Deserts are extremely dry and only few types of animals can live here. The deserts only get about 6 inches of rain each year. Not many plants can survive in the desert.

ANTELOPE

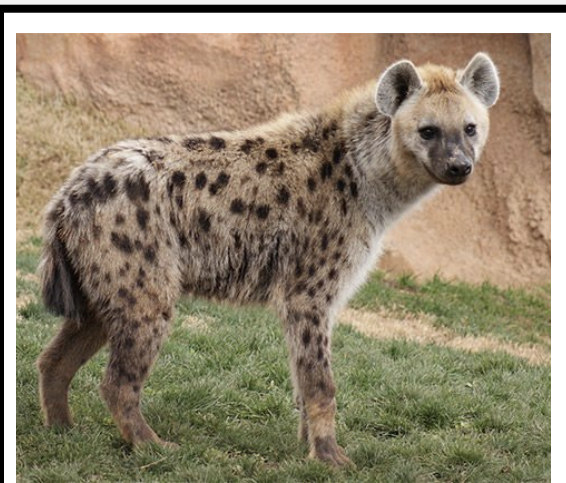

CAMEL

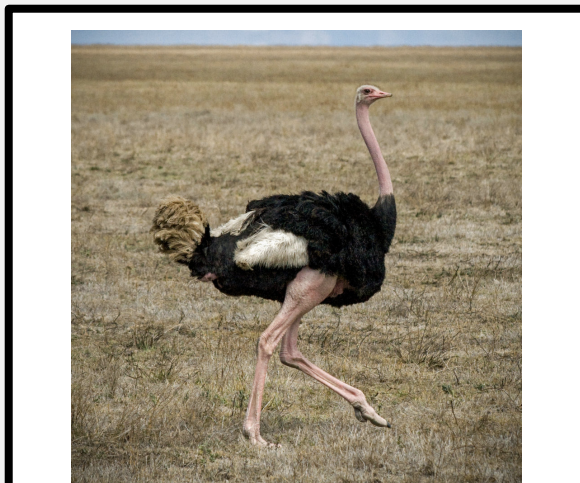

COBRA

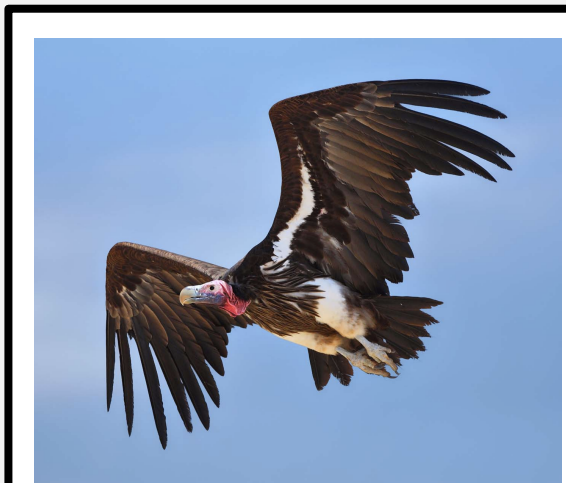

ANIMALS IN THE DESERTS

HYENA

OSTRICH

VULTURE

TROPICAL RAINFOREST

The Tropical Rainforest gets about 9 feet of rain each year. Year-around, it gets an even rainfall. The number of animals that live in the Tropical Forests add up to more than all of the other habitats combined.

ANACONDA

LEOPARD

IGUANA

ANIMALS IN THE RAIN FOREST

MACAW

TOUCAN

TURTLE

MOUNTAINS

In the Mountains, the higher the altitude... the cooler the temperature. Therefore, most animals live below the tree lines. During climate change, plant and animal life also changes.

BUFFALO

BLACK BEAR

COYOTE

ANIMALS IN THE MOUNTAINS

MONKEY

TIGER

WOLF

POLAR REGIONS

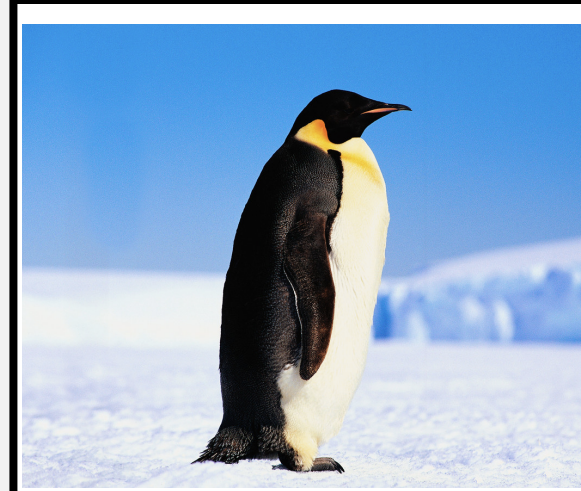

The Polar Regions are the coldest places on Earth. Only few animal species can live here because a large part of the Polar Regions are frozen over.

SEAL

WALRUS

PENGUIN

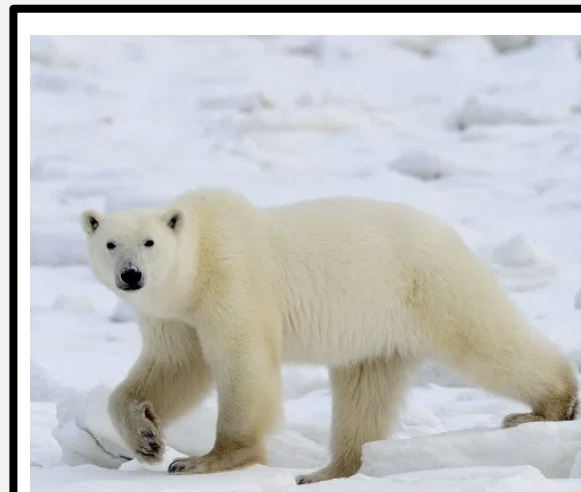

ANIMALS IN THE POLAR REGIONS

ARCTIC FOX

CARIBOU

POLAR BEAR

UNDER THE SEA

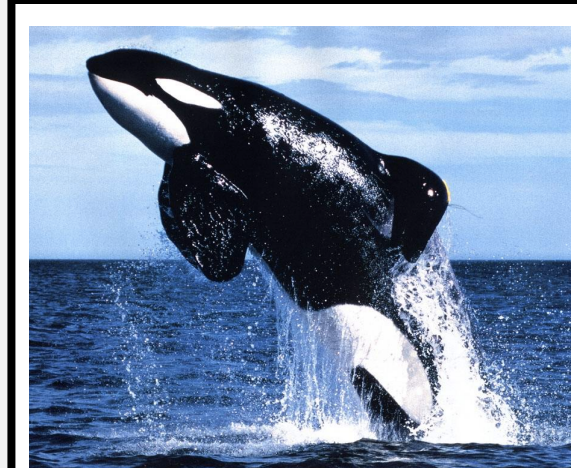

The Ocean is the largest animal habitat on Earth. Animal life underwater can be found in all depths of the water. Even though it's the largest habitat, only 5% of the animal species live in all four Oceans.

DOLPHIN

SHARK

WHALE

ANIMALS UNDER THE SEA

CLOWN FISH

SWORD FISH

SQUID
