

# 7 Climates Around the World

Third Grade

Let's travel  
around the  
world and  
experience all  
7 different  
climates in just  
one day!

## Polar Tundra

One of the Earth's coldest and harshest climates.

# Taiga

This climate contains the largest amount of land in the world.

# Mountain

The world's largest mountain is Mt. Everest and it is 29,036 feet.

# Deciduous Forest

The four seasons of winter, spring, summer, and fall are all present in this climate.

# Mediterranean

This climate is mainly found around oceans, gulfs, or any other large amount of water.

# Desert

The Sahara desert is the largest desert and it is 300 million square miles big.

# Grassland

This climate is used mostly for farming in the United States.

Congratulations!  
You did it! You  
have now been  
all around the  
world and have  
seen all 7 of the  
different  
climates!
