

Get Rich Evaluation

Nate Tiner

Get Rich is an iPad/Apple application and simulation of stock market trading. This application is free, but I want students to have access to it in my class. I believe this application does two things, introduces students to a real-world concept, and teaches students how to manage their money wisely. Now this app isn't the best simulator of the stock market, but it is a good way to introduce the concept of investing. I believe in making content meaningful and applicable, and this is a real-world application of math, and it also prepares students to be independent where they can manage their finances one day. I would have students use this application as a bell ringer and free time after they complete their work, I believe that students would be interested in this app as it is appealing and educational, and overall, it will keep them motivated to learn new material.
