

TopGrade Quiz Maker Evaluation

Nate Tiner

TopGrade Quiz Maker is what it says it is, it is a tool to make quizzes. It is an iPad/Apple application. It is a cheap application, as it is free to download, while you can upgrade to a professional quiz maker for just \$4.99 or \$1.99 and remove ads for \$0.99. Now this application is not the best for making quizzes as a teacher, but it is very good to make quizzes as a student. What I mean is, students could make quizzes to study for tests or other assessments, like flash card basically. Now it is hard to make quizzes for your students to actually take, unless if you made it like a study quiz. Although, there are other applications that would be much better for in class quizzes and practice quizzes, it is still a useful tool and can be used for any subject. I would encourage students to make their own quizzes using this tool and I would do review games as well with this app.
