

Classroom Technology Wish List

- MacBook for every student-if I have 30 students, then 30 MacBook's, 20 students, 20 MacBook's, etc.
- MacBook and Desktop Computer that is Windows.
- I would like a newer Smart Board that comes with its own projector and a separate computer for it. I would use it for interactive lessons.
- I would also like a TV in the classroom with an Apple TV hooked up to it for streaming and other presentations. I want this to actually work too.
- Subscription to Calm
- Calculators, graphing calculators preferred
- Class Printer-Colored
- Rocketbooks for me personally, and one for each of my students, yes they can take notes on their laptops, although some like using paper and pen much better, and this is a combination of both, its also environmentally friendly.
- 5 Sphero bolts for students to be able to get introduced to coding, and can also entertain them as well.
- Books on why learning these certain subjects are important.
- Subscription to Time4Learning.
