

## Coding Books Lesson

1.) Grade Level: 2<sup>nd</sup> Grade

2.) Curriculum Topic: Technology/Reading

3.) Tools: If you give a mouse an iPhone, QR Code

4.) Synopsis: For our lesson, I will be reading If you Give a Mouse an iPhone. This book stuck out to me the most while doing this lesson and I would like to show my students the importance of technology and how beneficial it can be if you don't abuse it. Once read, my students will then get on their devices (Chrome book) and find technology books with QR codes. Once they find their book online, they will scan the QR code with an iPad. and read a book to themselves or do research on it.
