

Evaluation Write Up

By Megan and Peyton

Title: Padlet

Version: 82.0

Publisher: Wallwisher, Inc.

Target Audience: 4+

Use in curriculum: This would be a great app to implement in the classroom. It allows students to create their own Padlet which can be students typing a response or asking a question and allows other classmates to respond.

Cost: Free, in app purchases available

Does it pass APPS: Yes

Description of the software: “Padlet is a digital canvas to create beautiful projects that are easy to share and collaborate on.”

Personal review of the software: We believe that Padlet would be a great app to use to drill content that was previously learned in class. Some of the areas on the app would be more advanced than the skills that our first graders would have, but there are areas I can see using in a classroom. The teacher chooses the subject matter and the graphic organization so the content can be individualized to each teacher's classroom.
