Evaluation Write Up

By Megan and Peyton

Title: Stick Around by Tony Vincent

Version: 1.18

Publisher: Explain Everything sp. z o.o

Target Audience: ages 4 and up

Use in curriculum: Any subject!

Cost: $2.99

Description of the software: "Play, design, and share sorting and labeling puzzles! Stick Around comes with an assortment of puzzles, including ordering decimals and classifying rocks. It's the player's job to drag the stickers from the tray to their correct spots on the background before time runs out."

Personal review of the software: We absolutely love this app! It has so many special features it offers that would be useful as a parent or

as a teacher. You can create a puzzle or use one already made! It is very easy to navigate and is useful for all grades and subjects! This app has many possible uses and would keep students engaged. It promotes creativity, evaluation, analyzation, and even application!
