

April Newsletter

Using Technology to Enhance Learning

Students in our classrooms utilize education in the classroom. This month, the students are producing a news program to demonstrate their skills as well as learn about and inform their community.

Creating the News

Students will be using time during the school day to produce their news program. This time is allotted to not interfere with regular classes.

The schedule is as follows:

| | |
|---------------|------------------|
| 8:00 – 11:30 | Regular Classes |
| 11:30 – 12:30 | Lunch |
| 12:30 – 1:00 | Producer Meeting |
| 1:00 – 1:30 | Shooting/Editing |
| 1:30 – 3:10 | Regular Classes |

Students in the Community

There will be some of our students who will be going around our community as student reporters. They will be interviewing parents, teachers, and community leaders. We would appreciate as much cooperation as possible with our student reporters.

Things Students May Need

While our school provides all the equipment necessary to produce this news program, there are a few things that our student reporters may need that the school cannot provide. These include:

- Business attire for journalists
- Accessible computer outside school
- Internet access outside school
- Good business walking shoes
- More time for extensive work

Where to Find the Project

Our news program will be aired on Local Channel 4. The program will also be available via livestream at the school website. The program can also be viewed on demand after the broadcast at the school website. There will also be a flyer sent out with this information available. We hope you watch and enjoy our program!
