

Ms. Helton's Classroom Feud

I plan on using Classroom feud for a quick game for the students, rather if we are inside for recess, earned game time, or finished class work early. I could easily change the names and question to associate with lessons of any subject, but I rather use it as a game. It's a good way to give the students a brain break when they feel overwhelmed.

The Water Cycle E-book

I plan on using The Water Cycle E-book to collaborate with a science lesson with a fun video at the end! This lesson will teach the students the steps of the water cycle (precipitation ,condensation, evaporation ,etc.) I think using a PowerPoint along with a fun song will help the students memorize the water cycle.
