

Introduction to Adjectives

Grade Level: First

Curriculum Topic: Language – Adjectives

Tools: Animoto and Google Forms

Synopsis: I will introduce the topic of adjectives by making an Animoto video to show my students. In the video I will explain what an adjective is, what its job is, and provide a few examples. After watching this video, students will answer a short Google Form to show me what they learned. In the form, I will ask students five questions regarding adjectives, and some of the questions will ask students to identify which word is the adjective in a sentence. This lesson is to familiarize students with adjectives and test their knowledge after an introductory lesson.
