

Grade level: Kindergarten

Curriculum topic: Counting

Tools: Inspiration/ Go Noodle

TTW create an inspiration page for counting one through twenty-five by ones, counting by five to 100, and counting by ten to 100. The graph will be broken down by fives for the first two categories and by tens on the last. TTW break the numbers up so the students can focus on a small amount at a time. For each group TSW watch a Go Noodle video that is interactive. TSW sing along with the video. After each video, TTW model counting to twenty-five and to 100 by five and ten. Next, TSW count with her. Last, they will count by themselves. After the lesson is over, TTW tell them they will continue working on skip counting during the next lesson.
