

Grade level: Kindergarten

Curriculum: Identifying colors

Toys: Spectrums/Youtube

TTW pass out a spectrum to each student in the class. She will tell the students they are going to use the spectrum to name colors. They will first watch a video about the main colors. After watching the video, the teacher will start the activity. She will hold up a card that is a solid color, saying the color. The student will tap the cube on the correct color. They will do this activity through the colors two times.
