

Grade level: Kindergarten

Curriculum: Phonemic Awareness

Toys: Specdrums/iPad

TTW give each student an iPad and headphones. The iPad will have a video called Counting Syllables pulled up. Each student will watch and listen to the video. After the video, the class will remove the headphones and listen to the teacher for directions. Each desk will have a specdrum toy on it. TTW tell them they will count syllables with the toy. For each word they will tap the cube down and count the number of syllables. It will play a note on each tap. TSW repeat the amount of syllables to the teacher after each word is segmented.
