On-line Tools

1. Kahoot
   https://kahoot.com/
   - Kahoot is a website where teachers can log on and create a trivia game to play in the class with his/her students. This app can be played with an iPad, Chromebook, computer or phone. Kahoot can be quizzes, surveys, or discussion items. The teacher can make a Kahoot for a whole-class or for individual instruction, depending on the needs of the classroom. It can be used for classroom instruction or for reinforcing and lesson and content.

   -I love Kahoot. I always get excited when it is time to play – that the competitive side of me. I feel like my main purpose for using the Kahoot in the classroom would be to reinforce things have already been taught – like as a review for a test. It will also allow me see things I need to reevaluate with my students to make sure they understand what has been taught.

2. Smart Exchange
   https://exchange.smarttech.com/
   - Is a free tool. It is games/interactive lessons that can be played on the smartboard or whiteboard. A teacher can also connect with other teachers to share lesson plans or ideas. It has lesson activities, images and videos.

   - This is a tool I will use as whole class instruction. I will go on the site and download a lesson or a game. For instance, if I am wanting to do a lesson in math on greater than or less than, I can download an interactive game for the students to take turn walking up to the smart board and to interact with.

3. Google Classroom
   https://edu.google.com/
   - Google Classroom is a social tool. This can be used in many ways. It can be used as a student to student tool which allows students to ask questions and respond to one another. Additionally, teachers can respond to the students. Teachers can also use this tool to provide instruction, give assignments, or

give tests. It can also be a place to post grades and can be used for the students to keep up with their progress throughout the school year.

-I do know a lot of educators that use this program in their classroom for activities, assignments, tests and grades. I plan on using it for everything mentioned. It will also be a tool that parents can use to access their child's assignments and homework.
